PROJECT

Title: Health Product Recommendation
Role: Back-end, Database and Front-end
Technologies: Html, Css, Java Script, Php and MySQL
With the help of Html, css, JavaScript as front end and Php, php as a back-end language were used to create the project. The main purpose of
this project is to help the user to easily search for herbs and fruits.This system helps the user to reduce its searching time to a great
extent by allowing the user to enter its health problem and search accordingly.
